

LENA Research Foundation PARENT CENTER COORDINATOR

A dream job for the right person who wants to make a difference!

LENA Research Foundation, a not-for-profit organization in Boulder, Colorado, is accelerating language and cognitive development in infants and toddlers. We seek an individual to work full time as a Parent Center Coordinator. The chosen candidate will help develop and implement the church based Smarter Happier Baby™ Program using LENA technology in a unique and groundbreaking way with Latino parents and their children.

This is a wonderful opportunity for someone with interest in the areas of language acquisition and child development who wants to improve the lives of infants and toddlers and close the gap between the haves and have-nots.

As our Parent Center Coordinator, you will:

- Help recruit families to participate in this landmark new program
- Train volunteers in methods to accelerate language development and the operation of the LENA system
- Provide families and church volunteers with information, coaching and guidance
- Monitor participant activities and progress
- Troubleshoot and help fine-tune this amazing new program

Ideal candidates will possess:

- Fluency in written and spoken Spanish
- 4 yr college degree
- 5 years work experience
- Excellent organizational skills with an attention to detail
- Effective interpersonal, communication & management skills
- Ability to work independently
- An interest in research and child development/language acquisition
- Experience working with immigrant families very helpful
- Supervisory experience helpful
- Computer experience helpful

At LENA Research Foundation, we believe that work should be enjoyable and by working together as a team you are making a difference. If you are the best at what you do and would like to join a team that is making a difference everyday, email your resume to PCC@LENAfoundation.org. Visit our website www.lenafoundation.org for more information about the LENA Research Foundation.

LENA Research Foundation

The LENA Research Foundation is a non-profit 501c3 charitable organization. The Foundation develops advanced technology for the early screening, research, and treatment of language delays and disorders in young children. Over a five-year period, the foundation created the LENA (Language ENvironment Analysis) System, the world's first automatic language collection and analysis tool and the foundation's principal technology. The foundation employs a team of scientists and engineers skilled in computerized speech and speaker recognition, microelectronics, statistical research, and children's language acquisition and development; they are dedicated to helping the foundation improve language development worldwide.

"Advanced technology to accelerate language development of children 0-5 and for research and treatment of language delays and disorders."
